

Plant Evaluation Program

Altair's Plant Evaluation Program

Altair Equipment Co., Inc. has grown to become one of the leading manufacturer of water treatment and waste water equipment. Since the emphasis is placed on the bottom line these days, it's imperative that companies use a little prevention now - such as PEP - to avoid a lot of difficulties later. A

Plant Evaluation Program gives you access to our expertise and knowledge of water treatment equipment and is designed to help you get optimum performance from your equipment. PEP consists of a professional inspection of your plant by one or more members of Altair's technical staff, including specialists in your type of equipment.

They will carefully check your equipment - *regardless of whose design* - and tell you if it is mechanically intact and if it is doing the job it was designed to do.

Guarenteed to Meet ALL Your Water Equipment Needs

If you have any of the following equipment in your plant, you can profit from PEP:

- Boiler Feed System
- Chemical Feed System
- Clarifier
- Condensate Polishing Demineralizer
- Condensate Return System
- Deaerator
- Dealkalizer
- Decarbonator
- Degasifier
- Demineralizer
- Filter
- Hot Process Softener
- Neutralizer
- Reverse Osmosis
- Softener
- Control Systems

PEP Improves Your Plant's Efficiency

Once the PEP team has finished its inspection of your plant, you will receive a detailed report which will include a general evaluation of your operation and list specific components that need to be repaired and/or replaced.

It will also include minor equipment modifications, better chemical utilization and other recommendations to improve the efficiency of your water treatment

equipment. There may also be a section on major system modifications for your consideration, if required. Of course, your PEP report will be confidential.

Solving Past, Present & Future Problems

If you have your water treatment equipment now, chances are you'll avoid more serious problems in the future....problems which could be considerably more expensive to correct at a later date. In

many cases, it takes an objective, reliable, outside organization - such as Altair to uncover problems. Even if you don't sense the need for a PEP evaluation at this time, keep Altair in mind. For over a

quarter of a century, companies have been coming to Altair for a practical, economical and versatile solutions to almost any water treatment problem.
